

September 2016 CBITS Report

This report provides a summary of data obtained from CHDI'S EBP Tracker data system for Cognitive Behavioral Intervention for Trauma in Schools (CBITS). Data provided is for the last full month that data is available. The total number of children receiving CBITS (including new children), total number of children who ended CBITS, and total number of CBITS groups (including new groups) are displayed for each CBITS agency. Year-to-date totals are also included for the number of children who ended CBITS, number of CBITS groups, and number of children served, from the start of the fiscal year through the current month.
