

MATCH-ADTC Follow Up Forms (Monthly, Periodic, & Discharge) English

Required Forms					
1. MATCH-ADTC Monthly Session Form \square					
2. Top Problems Assessment \square					
3. Child's Behavior & Functioning* Ohio- Caregiver Report (child 5+) □ Ohio- Child Report (child 12+) □					
4. Chosen Assessment(s) specific to MATCH-ADTC* \square					
Note: The recommended ongoing assessment for MATCH-ADTC is an age					
appropriate measure given the child's Primary Problem Area. We suggest					
the PROMIS for anxiety, SMFQ for Depression; CPSS (7+) or YCPC 5 (under					
7) for Trauma; and Ohio for Conduct. Alternate or additional measures can					
be used based on clinical judgment of primary symptom area targeted by					
treatment					
5. Satisfaction Questions (caregiver or child)* \square					
6. Client Discharge Face Sheet □					
*Required at periodic and discharge					

MATCH-ADTC Monthly Session Form

VALIDATION REQUIREMENTS AND SYMBOLS EXPLAINED

! This symbol means the field is one of the minimum fields that must be filled out to save the record. No data will be saved unless these fields are completed.

This symbol means the field is a required field in order to save the record as completed. Although you can save the record, the system does not consider the record to be completed unless ALL of these fields are completed.

Data Entry Person: Greved-out fields are pulled in from the completed Client Face Sheet-Intake, so you won't have to enter them again here

SCORING

The Traumatic Events page (items 1-13) is important to include before administering the symptom portion because it is important to know all of the traumatic events one has experienced that may be linked to symptoms. This page provides a systematic menu to facilitate recall of all events.

Symptoms are scored for totality of events in contrast to many other checklists that rate for only one event.

Items 14-36 are PTSD symptom items. Sum the scores from items 14-36. The suggested cutoff is based on a "probable diagnosis" of PTSD, which is a score of 26 or more for items 14-36. When youth have scores lower than 26 they can still have symptoms and functional impairment that would benefit from treatment.

(Items 37-42 are functional impairment items. These can summed for an impairment score but are not used for the PTSD symptoms score.)

		Probable
	<u>Items</u>	Diagnosis Cutoff
PTSD Symptoms	14-36	<u>≥</u> 26
Functional impairment	37-42	<u>≥</u> 4
