DCF CONNECTICUT

EBP INTAKE ASSESSMENT PACKET

TF-CBT & MATCH-ADTC

Ages 0-4 Years
English

Required Forms

1. Demographic Information:
   Client Intake Face Sheet ☐

2. Child's Trauma History:
   Trauma History Screen- Caregiver Report ☐

3. Child's Trauma Symptoms:
   YCPC-5- Caregiver Report ☐

4. Child's Behavior & Functioning:
   PPSC- Caregiver Report ☐

5. CESDR Caregiver Depression: ☐

Supplemental Assessments

(Included in Supplemental Assessment Packet)

Child Depression:
SMFQ- Child Report
SMFQ- Caregiver Report

Caregiver Symptoms:
PSS (Parenting Stress)
PCL-5 (Caregiver Trauma Symptoms)

Child Health and Development Institute of Connecticut, Inc.

Lang, J.M., & Franks, R. Connecticut Center for Effective Practice, CHDI (2007)

Below is a list of symptoms that children can have after life-threatening events.
When you think of ALL the life-threatening traumatic events from the first page, circle the number below (0-4) that best describes how often the symptom has bothered you in the LAST 2 WEEKS.

0	1	2	3	4
Not at all	Once a week or less/ once in a while	2 to 4 times a week/ half the time	5 or more times a week/ almost always	Everyday

14. Does your child have intrusive memories of the trauma? Does s/he bring it up on his/her own?	0	1	2	3	4
15. Does your child re-enact the trauma in play with dolls or toys? This would be scenes that look just like the trauma. Or does s/he act it out by him/herself or with other kids?	0	1	2	3	4
16. Is your child having more nightmares since the trauma(s) occurred?	0	1	2	3	4
17. Did night terrors start or get worse after the trauma(s)? Night terrors are different from nightmares: in night terrors a child usually screams in their sleep, they don't wake up, and they don't remember it the next day.	0	1	2	3	4
18. Does your child act like the traumatic event is happening to him/her again, even when it isn't? This is where a child is acting like they are back in the traumatic event and aren't in touch with reality. This is a pretty obvious thing when it happens.	0	1	2	3	4
19. Since the trauma(s) has s/he had episodes when s/he seems to freeze? You may have tried to snap him/her out of it but s/he was unresponsive.	0	1	2	3	4
20. Does s/he get upset when exposed to reminders of the event(s)?	0	1	2	3	4

For example, a child who was in a car wreck might be nervous while riding in a car now.
Or, a child who was in a hurricane might be nervous when it is raining.
Or, a child who saw domestic violence might be nervous when other people argue.
Or, a girl who was sexually abused might be nervous when someone touches her.

21. Does your child get physically distressed when exposed to reminders? Like heart racing, shaking hands, sweaty, short of breath, or sick to his/her stomach?"	0	1	2	3	4

Think of the same type of examples as in #20.

22. Does your child show persistent negative emotions (fear, guilt, sadness, shame, confusion) that are <u>not</u> triggered by exposure to reminders of the event as in #20?	0	1	2	3	4

PLEASE CONTINUE ON NEXT PAGE…..

0	1	2	3	4
Not at all	Once a week or less/ once in a while	2 to 4 times a week/ half the time	5 or more times a week/ almost always	Everyday

23. Does your child try to avoid people or conversations that might remind him/her of the trauma(s)? For example, if other people talk about what happened, does s/he walk away or change the topic?	0	1	2	3	4
24. Does your child try to avoid things or places that remind him/her of the trauma(s)? For example, a child who was in a car wreck might try to avoid getting into a car. Or, a child who was in a flood might tell you not to drive over a bridge. Or, a child who saw domestic violence might be nervous to go in the house where it occurred. Or, a girl who was sexually abused might be nervous about going to bed because that's where she was abused before.	0	1	2	3	4
25. Has s/he lost interest in doing things that s/he used to like to do since the trauma(s)?	0	1	2	3	4
26. Since the trauma(s) has your child become more distant and withdrawn from family members, relatives, or friends?	0	1	2	3	4
27. Since the trauma(s), does your child show a restricted range of positive emotions on his/her face compared to before?	0	1	2	3	4
28. Has your child become more irritable, or had outbursts of anger, or developed extreme temper tantrums since the trauma(s)?	0	1	2	3	4
29. Has s/he been more "on the alert" for bad things to happen? For example, does s/he look around for danger?	0	1	2	3	4
30. Does your child startle more easily than before the trauma(s)? For example, if there's a loud noise or someone sneaks up behind him/her, does s/he jump or seem startled?	0	1	2	3	4
31. Has your child had more trouble concentrating since the trauma(s)?	0	1	2	3	4
32. Has s/he had a hard time falling asleep or staying asleep since the trauma(s)?	0	1	2	3	4
33. Has your child become more physically aggressive since the trauma(s)? Like hitting, kicking, biting, or breaking things.	0	1	2	3	4
34. Has s/he become more clingy to you since the trauma(s)?	0	1	2	3	4

PLEASE CONTINUE ON NEXT PAGE…..

0	1	2	3	4
Not at all	Once a week or less/ once in a while	2 to 4 times a week/ half the time	5 or more times a week/ almost always	Everyday

35. Since the trauma(s), has your child lost previously acquired skills? 0 1 2 3 4
    For example, lost toilet training?
    Or, lost language skills?
    Or, lost motor skills working snaps, buttons, or zippers?

36. Since the trauma(s), has your child developed any new fears about things that don't seem related to the trauma(s)? 0 1 2 3 4
    What about going to the bathroom alone?
    Or, being afraid of the dark?

FUNCTIONAL IMPAIRMENT

Do the symptoms that you endorsed above get in the way of your child's ability to function in the following areas?

0	1	2	3	4
Hardly ever/ none	Some of the time	About half the days	More than half the days	Everyday

37. Do (symptoms) substantially "get in the way" of how s/he gets along with you, interfere in your relationship, or make you feel upset or annoyed? 0 1 2 3 4

38. Do these (symptoms) "get in the way" of how s/he gets along with brothers or sisters, and make them feel upset or annoyed? 0 1 2 3 4

39. Do these (symptoms) "get in the way" with the teacher or the class more than average? 0 1 2 3 4

40. Do (symptoms) "get in the way" of how s/he gets along with friends at all – at daycare, school, or in your neighborhood? 0 1 2 3 4

41. Do (symptoms) make it harder for you to take him/her out in public than it would be with an average child?" 0 1 2 3 4
    Is it harder to go out with your child to places like the grocery store?
    Or to a restaurant?

42. Do you think that these behaviors cause your child to feel upset? 0 1 2 3 4

version 12/9/13

SCORING

The Traumatic Events page (items 1-13) is important to include before administering the symptom portion because it is important to know all of the traumatic events one has experienced that may be linked to symptoms. This page provides a systematic menu to facilitate recall of all events.

Symptoms are scored for totality of events in contrast to many other checklists that rate for only one event.

Items 14-36 are PTSD symptom items. Sum the scores from items 14-36. The suggested cutoff is based on a "probable diagnosis" of PTSD, which is a score of 26 or more for items 14-36. When youth have scores lower than 26 they can still have symptoms and functional impairment that would benefit from treatment.

(Items 37-42 are functional impairment items. These can summed for an impairment score but are not used for the PTSD symptoms score.)

	Items	Probable Diagnosis Cutoff
PTSD Symptoms	14-36	$\geq$ 26
Functional impairment	37-42	$\geq$ 4

Young Child PTSD Checklist
Caregiver Response Scale
