

## FAQS: PIE-EBP TIPS – MONTHLY SESSION FORM

Last Updated: 2/3/2020

During the integration, there were a few changes to the data collected on the monthly session form in PIE for MATCH & TF-CBT. Here's a list of the changes below:

1. **% time with caregiver, % of time with child, AND % of time with caregiver and child questions are no longer asked on the monthly session form.** Instead they are asked at discharge.
2. **Data on the number of *no shows* and *cancellations* are no longer asked.**
3. **The number of visits are no longer asked on the monthly session form.** Instead, the monthly session forms ask clinicians to indicate if the child was seen in the month, and the number of visits is asked at discharge. For outpatient provider care clinics (OPCCs), the monthly session form and discharge facesheets populate the number of visits in the model based on the activity occurrence data. (The number of visits on the discharge form is updated whenever an activity is saved on the activity occurrences page.) There are links on these pages that direct to the *Activity Occurrences* page. Depending on your agency's data entry processes, it is advisable to instruct clinicians on whether or not to ignore the *Go to Activity Occurrences* link on the monthly session form.

We have updated paper monthly session and discharge forms for TF-CBT and MATCH-ADTC reflecting the above changes.
